Reviewer Opt-In Guidance

- » Make sure your reviewer completes the opt-in process.
 - Some new users to ASME stop the process after creating their ASME account.
 - **THEY HAVE NOT COMPLETED THE PROCESS!!**
- » Reviewers will see the text below when they have successfully opted-in.

Thank you for signing up for the OMAE reviewer database.

The Review Process

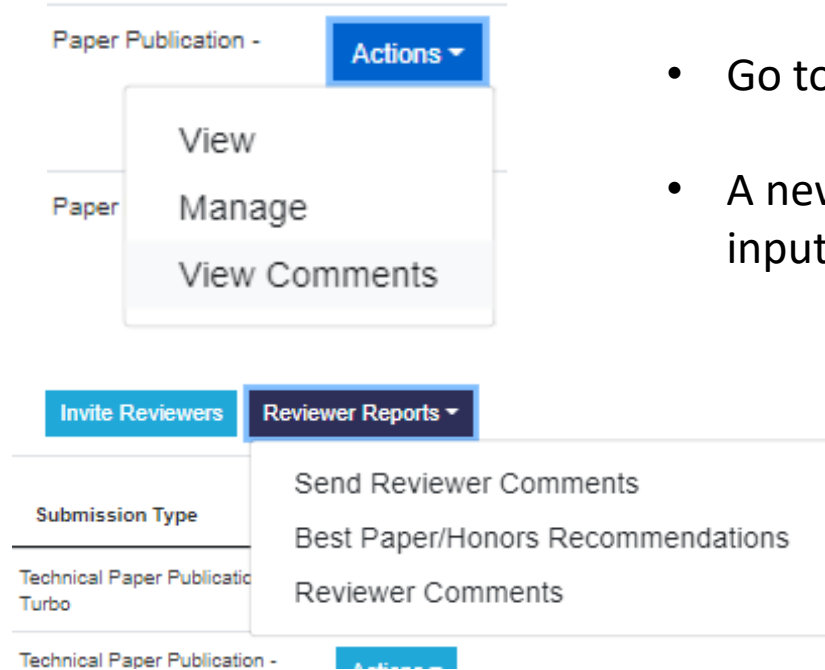

The purpose of review is to determine whether a paper is acceptable for publication, needs revision, or should be rejected. Recommendations must be supported by specific and critical comments. **Reviewing is a confidential process involving only the reviewer, program-making agency, and the editorial department.** Papers recommended for publication should be of high quality and of current technical interest. If rejection is recommended, keep in mind that you should state reasons in a professionally appropriate manner.

Please review the [ethical obligations of reviewers](#) before you begin reviewing papers.

- » Reviewers will become available for assignment approximately 30 minutes after seeing the above text.

Reviewer Opt-in Step-by-Step Process: <http://asmetraining.wpengine.com/reviewer-database-opt-in/>

Resource Materials

iThenticate Guidelines

- » Prior to assigning reviewers, organizers will need to analyze any matching results over **15%**
- » Two areas of concern: plagiarism (copying someone else's work), and lack of originality (copying your own previous published work)
- » When assessing a paper, consider:
 - Is there any source with high degrees of match (>15%), or are there just lots of <1% matches of phrases?
 - 50x <1% = no problem
 - 1x 50% = problem
 - If there is a source with a high match, has that source been properly referenced in the paper?
 - Are the matches limited to the introduction, description of the analysis, experimental setup, etc., or are there high matches in the results and conclusions portions of the paper?

iThenticate Guidelines

If you have concerns, discuss it with TPC. For feedback from ASME, email toolboxhelp@asme.org

Outcomes can be:

- » Reject the paper outright.
- » Caution the author about the concerns and request changes. These changes can include properly referencing papers with matches, and/or to reword sections to reduce the degree of outright copying. Organizer should check the final paper to make sure these directions have been followed. Proceed with reviews; reviewers should also comment on matches.
- » Let the paper go through with reviews with no special action.
